The values can vary considerably according toTurning on the Appliance. Starting a wash cycle. Make sure that the plug for the appliance is inserted into the wall socket. Make sure that the water supply is turned on to full pressure. Load the dishes. Pour in the detergent. Press the Power button, and the "POWER" light will turn on. Turn the knob located on the right of the control panel until the number or symbol for the cycle settingAfter five seconds the "POWER" light will flash, the wash cycle will begin. Note When washing, the knob will not rotate itself.When the buzzer constantly beeps six times, the "POWER" light will turn on and the cycle has finished. TurnWait a few minutes before unloading the dishwasher to avoid handling the dishes and utensils whileThey will also dry better. Cancelling or modifying a wash cycle setting. A cycle that is underway can only be modified if it has been running for a short time. Otherwise, theRotate the knob to the mark of "Reset" then selectThis will allow you to save on water and energySelect the programme see the paragraph entitled "Turning on the Appliance"After Every Wash. After every wash, turn off the water supply not necessary for models with "AquaStop" to the applianceRemove the plug. Before cleaning or performing maintenance, always remove the plug from the socket. Do not run risks. No solvents or

Abrasive Cleaning Products. To clean the exterior and rubber parts of the dishwasher, do not use solvents or abrasive cleaning. To remove spots or stains from the surface of the interior, use a cloth dampened with water and a little. Moving the Appliance. If the appliance must be moved, try to keep it in a vertical position. If absolutely necessary, it can be. Seals. One of the factors that cause odors to form in the dishwasher is food that remains trapped in the seals. Periodic cleaning with a damp sponge will prevent this from occurring. The door should not be left in the open position since this could present a tripping hazard.

When You Go on Holiday. When you go on holiday, it is recommended that you run a wash cycle with the dishwasher empty and. Regular inspection and maintenance of your appliance helps to prevent problems from occurring. This. Overall condition of appliance. Check that no grease or scale has accumulated on the inside of the dishwasher. If you discover any deposits. Rinse aid. Check the LOW RINSE AID indicator " 7 ", on the control panel. Top up with rinse aid, if required. The filters " 8 ", " 9 " prevent larger particles of food in the water. After undoing the coarse microfilter " 8 ", the filter unit " 9 " Insert the filter unit " 9 " and tighten the coarse microfilter. Lime and remnants of food in the washing water can block the. Inspect the nozzles in the spray arms for blocked holes. If necessary, pull the lower arm " 11 " upwards and lift it off. Unscrew the upper spray arm " 10 ". Clean both spray arms under running water. Refit the spray arms. Ensure that the lower arm has locked. Resolving minor problems yourself. Experience has shown that you can resolve most problems that rise during normal daily usage yourself. The following list of common occurrences and Problems. Appliance does not start up. Fault with fuse in mains electricity supply. Plug not inserted in wall socket. Appliance door not closed properly. Programme has not been chosen. Water tap not turned on. Blocked strainer in water intake hose. Do not forget that repairs should only be carried out by a qualified specialist. Improper. When the alarm sounds in a series of 2 beeps, pause, 2 beeps, pause. When the alarm sounds in a series of 3 beeps, pause, 3 beeps, pause. When the alarm

sounds in a series of 6 beeps, pause, 6 beeps, pause. Spray arm rotates with difficulty. Spray arm is blocked by small items or food remains. Lid in detergent compartment cannot be closed. Detergent compartment has been overfilled. Mechanism is clogged with remnants of detergent. Indicator lamps do not extinguish after washing has finished.

Power Button is still set to ON. Remnants of detergent stuck inside dispenser. Compartment was damp when it was filled up with detergent. Compartment must be dry before Water remains inside appliance after programme has ended. Blockage or kind in drainage hose. Pump is jammed. Filters are blocked. The programme is still running. Wait for the programme to end. Unusual amount of foam is increased. Normal washing up liquid has been poured into the rinseaid container. Remove any spilled rinse aid with a cloth as it could otherwise lead to excessive foaming during the Appliance stops suddenly while washing is taking place. Cut off electricity supply to appliance. Water supply has been interrupted. Knocking sound can be heard while washing is taking place. A spray arm is knocking against the dishes inside the appliance. Rattling sound can be heard while washing is taking place. Crockery has not been stacked properly inside the appliance. This is caused by the way the water pipes have been laid and it has no effect upon the way the Remnants of food are stuck to the dishes, cutlery, etc. Dishwasher was not loaded properly. Jets of water could not reach all parts of the dishes, etc. Too many items in the rack. Items in the rack were touching each other. Not enough detergent was added to dispenser. Selected wash programme was not intensive enough. Rotation of spray arm was obstructed by dishes, etc. Nozzles in spray arm are blocked by remnants of food. Filters have been incorrectly fitted. Wastewater pump is jammed. White stains are left on crockery, glasses have a milky appearance. Not enough detergent was added to dispenser compartment. Amount of rinseaid was set too low. Dishes, cutlery, etc. have not been dried. Selected programme did not include drying function. Items were removed from dishwasher too soon. Glasses have a dull appearance. Tea stains or traces of lipstick have not been completely removed. Detergent does not have a sufficient bleaching effect.

Washing temperature was set too low. Traces of rust on cutlery. Cutlery is not sufficiently rustproof.

Glasses become clouded and discoloured; coating cannot be wiped off. Unsuitable detergent was used. Glasses are not dishwasherproof. Smears left behind on glasses and cutlery; glasses have acquired a metallic appearance. Amount of rinseaid set too high. WidthDepthHeightCapacity. Mains water pressure. Power supply. Maximum current intensity. Total absorbed powerNotes on waste disposal. Old appliances still have some residual value. Page 2 Dear Customer You are now the proud owner of one of the finest and most modern products that todays technology can produce. Please read all the instructions carefully as they contain information on how to operate and care for your dishwasher so that you may gain the maximum benefit from it. Store this book in a safe place for future reference. Before use Unpacking Remove all packaging material, accessories and documentation from the machine. Damage Do not use the machine if it has been damaged in transit. Page 3 General precautions Children Never allow children to play with the dishwasher. Detergents contain irritants and abrasives which could affect the eyes, mouth and throat. Keep detergents out of reach and only put them into the machine just before starting a washing programme. Dishwasher waste water is not suitable for drinking. Never allow children to play on or sit on the door when it is open. Please ensure that packaging material is disposed of in a responsible manner. Page 6 Salt container Special salts are used as a water softening agent in dishwashers Salt container The dishwasher is equipped with an automatic salt release system. The salt container needs to be filled with regenerating salts specially developed for dishwashers. Small grained or powdered salt is recommended.

Do not use table salt or edible salt as these contain insoluble substances. S AL Z TU Z T SEL The dishwasher requires lime free water for optimum operation. Page 7 Detergent Only use detergents specifically intended for dishwashers Adding detergent The detergent and rinse aid dispensers are on the inside of the door. If the dishwasher is considerably full and the dishes are relatively dirty, fill the main container A up to the 25cm level. If the dishwasher is not quite full and the dishes are only

slightly soiled, fill the main container A to the 15cm level. Page 8 Rinse aid Only use rinse aid specifically intended for dishwashers Rinse aid prevents water and calcium streaking on dishes and speeds up the drying process. It is advisable therefore to always ensure that there is an adequate amount of rinse aid in the dispenser. You can adjust the amount of rinse aid released during a programme by turning the dispenser regulator C The regulator level may be set between 1 minimum and 6 maximum. Page 9 Loading The dishwasher has a twelve place setting capacity There are three separate baskets in the dishwasher. 1 The upper basket is used for cups, saucers, glasses and smaller dishes. The upper basket has glass holders which may be lifted and then folded to accommodate larger items. 2 Glass Support depending on the model When placing the glasses or goblets with a long grip, lean them against the glass support, the edge of the basket or the shelf but not against the other pieces. Page 10 Loading The upper basket has a height adjustment facility. The basket may be lowered to facilitate the loading of larger items. The adjustment method varies from model to model and you should check which method is pertinent to your machine. Defy Dishmaid Release the latches on both the right and left tracks by opening them sideways. Roll the basket forwards to remove it. Position the basket so that the upper set of rollers engages in the tracks and close the latches.

Page 11 Cleaning Always disconnect the appliance from the electrical supply before cleaning it Cleaning the cabinet Wipe up any detergent, softener and other spills as they occur with a soft damp cloth. Periodically clean the cabinet, the inside of the door and door gasket with a damp warm soapy cloth, rinse and dry. Do not use abrasive or corrosive substances. Cleaning the filters To ensure optimum performance, the filters should be cleaned regularly. Page 12 Operation Defy Dishmaid Progress indicator lights Progress of the wash cycle may be monitored by observing the progress indicator lights on the control panel. 12 Operation Open the door of the machine. Load the dirty dishes into the baskets. Check that the upper and lower spray arms can rotate freely. Add detergent. Check the rinse aid and water softener salt indicators and replenish if necessary. Close the dishwasher door. Switch on the electricity. Remove the drain hose. Ensure that the hoses are not twisted or kinked during transport. Only transport the machine in an upright position. Page 15 Service Centres If you have followed the instructions and still have a problem, contact the nearest Defy Service Centre.
